(Formerly Soviet Mathematics—Doklady)
Translation edited by Ben Silver with the assistance of Ralph Sizer

A translation of

РОССИЙСКАЯ АКАДЕМИЯ НАУК. ДОКЛАДЫ АКАДЕМИИ НАУК. МАТЕМАТИКА

Издательство "Наука", 1994 г.

Each issue corresponds to one volume of the Russian *Doklady*, which is issued three times a month, six issues constituting a volume.

SUBSCRIPTION INFORMATION. *Russian Academy of Sciences. Doklady. Mathematics* is published six times per year. Subscription prices for Volumes 48–49 (1994) are $785 list, $628 institutional member, $471 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $10; subscribers in India must pay a postage surcharge of $20. Expedited delivery to destinations in North America $19; elsewhere $46. Combination paper and microfiche subscription prices are $1,044 list, $835 institutional member. Microfiche of each issue will be mailed the fastest way possible before the issue is mailed by the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

BACK NUMBER INFORMATION. For back issues see the *AMS Catalog of Publications.*

Orders for subscriptions and publications of the American Mathematical Society should be addressed to American Mathematical Society, P.O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Address changes and other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to `reprint-permission@math.ams.org`.

The appearence of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale.

Russian Academy of Sciences. Doklady. Mathematics is published six times per year by the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213. Second class postage paid at Providence, Rhode Island. Postmaster: Send address changes to Russian Academy of Sciences. Doklady. Mathematics, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

RUSSIAN ACADEMY OF SCIENCES
DOKLADY. MATHEMATICS

Volume 49, Number 1 July 1994

CONTENTS

V. V. Bezgin, A. Yu. Khrennikov, M. Endo, and O. Yuoko [Yoko], *A statistical biological model with p-adic stabilization* 1
V. A. Emelichev and M. K. Kravtsov, *On the unsolvability of vector discrete optimization problems on systems of subsets in the class of algorithms involving linear convolution of criteria* 6
S. D. Iliadis, *Universal regular spaces of weight* τ 10
V. L. Levin, *Exchange models with indivisible commodities, and implementation of competitive equilibria in games of auction type* 15
V. L. Makarov and V. V. Khlobystov, *Increasing the accuracy of approximations of polynomial operators in Hilbert spaces by the interpolation method* 20
V. V. Napalkov and I. Kh. Musin, *On polynomial approximation in a weighted space of entire functions* 25
Yu. D. Pletner, *On new classes of generalized analytic functions* 29
I. P. Shestakov, *Quantization of Poisson algebras, and weak speciality of the Jordan superalgebras associated with them* 34
A. V. Arutyunov and S. M. Aseev, *The maximum principle in optimal control problems with phase constraints. Nondegeneracy and stability* 38
Yu. F. Dolgiĭ, *Representation of the monodromy operator as the sum of a finite-dimensional operator and a Volterra operator* 43
I. I. Erëmin, *The Pareto-sequential problem of linear optimization, and duality* 47
V. V. Zhikov, *On the homogenization of the system of Stokes equations in a porous medium* 52
V. I. Zubov, *Potential systems of differential equations* 58
Yu. E. Anikonov, *Formulas in a multidimensional inverse problem for an evolution equation* 62
V. A. Belyaev, *A description of the structure of the set of polynomial convergence in the complex plane* 64
M. M. Gekhtman, M. M. Gekhtman, Jr., and Yu. M. Zagirov, *Sharp estimates of normalized eigenfunctions of the Sturm-Liouville operator on a finite interval with continuous positive weight function* 68
L. L. Gromova, *An estimate of the seventh coefficient in the class of odd functions* 71
V. Yu. Dubinskaya, *Homogenization of a stationary heat field in an inhomogeneous medium with three small parameters* 74
Yu. L. Ershov, *On the Galois groups of* RC_ζ^**-fields* 79
L. N. Lyakhov, *Spaces of Riesz B-potentials* 83

G. D. Orudzhev, *On solvability of boundary value problems for an abstract polyharmonic equation* 88
V. E. Balabaev, *Complex canonical elliptic systems* 92
I. V. Bezmenov, *A method for the numerical solution of an interior problem for the Helmholtz equation with transmissivity conditions of variational type on an artificial boundary* 101
B. T. Bilalov, *Basis properties of some exponential systems and powers with shift* 107
G. V. Demidenko, *On weighted Sobolev spaces and integral operators determined by quasi-elliptic equations* 113
L. A. Zhornitskaya and V. S. Serov, *On a uniqueness theorem for the Sturm-Liouville operator with a strongly singular potential on a closed interval* .. 119
V. A. Kondrat'ev and S. D. Èĭdel'man, *On positive solutions of second-order quasilinear elliptic equations* 124
P. I. Naumkin and I. A. Shishmarev, *On the connection between the solutions of various nonlinear equations for large time* 127
A. L. Skubachevskiĭ, *Generalized and classical solutions of boundary value problems for differential-difference equations* 132
A. G. Chentsov, *Asymptotic attainability and generalized representation of it* .. 138
K. A. Abgaryan, *Solution of control problems for nonstationary multichannel automatic control systems by quasidiagonalization of the matrix of the linear part of the perturbed motion equations* 144
A. A. Bolibrukh, *On analytic transformation to Birkhoff standard form* 150
S. V. Bochkarev, *Series generated by Steklov functions* 154
V. V. Volchkov, *Approximation of functions on bounded domains in R^n by linear combinations of shifts* 160
E. G. Savateev, *On the reduction of an inverse problem for an equation of hyperbolic type* 163
E. M. Semenov, *Estimates of multipliers with respect to the Haar system in the space L_1* 167
V. I. Shalashilin and E. B. Kuznetsov, *The best parameter for extension of a solution* 170
V. G. Abdrakhmanov and Yu. N. Smolin, *A criterion for the existence of a Green's matrix in the Cauchy problem for a functional-differential equation* 174
M. G. Bitsadze, *Convergence in the space $L^p(T^n)$, $p \in (0, 1]$, of special multiple trigonometric series* 176
Yu. G. Borisovich, V. G. Zvyagin, and V. V. Shabunin, *On solvability in W_p^{2m+l} of a nonlinear Dirichlet problem in a narrow strip* 179
S. V. Bochkarev, *Almost everywhere convergence of integrals of Dini type* 183
A. A. Zolotykh and A. A. Mikhalev, *The rank of an element of a free Lie (p-)superalgebra* 189
V. I. Kachalov and S. A. Lomov, *Pseudoanalytic solutions of singularly perturbed problems* 194
S. A. Pichugov, *Sequences of operators bounded in measure* 198
V. Yu. Rovenskiĭ, *Metric decomposition of foliations with nonnegative curvature* 202
M. A. Stanev, *Surjective isometries in Banach spaces of slowly growing holomorphic functions on a ball* 206

Volume 49, Number 2 September 1994

CONTENTS

A. V. Bratishchev, *On analytic continuation of functions uniformly approximable by exponential polynomials* 211
V. A. Zheludev, *Wavelets based on periodic splines* 216
V. N. Koshelev, *On the divisibility problem for stochastic channels with a given constraint function* 223
Yu. V. Pokornyĭ, *On integral representation of Markov systems* 229
V. I. Prokhorenko, *On approximate and exact solutions of linearized Navier-Stokes equations in the case of plane flow* 233
M. D. Ramazanov, *Boundary layer functions of asymptotically optimal lattice cubature formulas* 240
V. A. Trubin, *Strength decomposition of graphs* 244
V. V. Aseev and A. A. Shalaginov, *Mappings that boundedly distort distance ratios* 248
Yu. G. Ventsov, *Constructive models of infinite algorithmic dimension* 251
Yu. L. Ershov, *Model-theoretic properties of RC^*-fields* 255
V. I. Zubov, *The problem of twisting of beams of charged particles* 260
S. M. Nikol′skiĭ, *Bernstein-type inequalities for algebraic polynomials on manifolds* 266
M. V. Novitskiĭ, *Quasianalytic classes of decreasing functions, and integrals of motion of the Korteweg-de Vries equation* 271
V. S. Pugachev, *On certain measures on a function space, with values in a Hilbert space* 276
A. L. Skubachevskiĭ, *On the problem of damping a control system with after-effect* 282
M. L. Sodin and P. M. Yuditskiĭ, *The infinite-dimensional real Jacobi inversion problem, and Hardy spaces of character-automorphic functions* 287
A. D. Bruno [Bryuno] and A. Soleev, *First approximations of algebraic equations* 291
A. V. Bulinskiĭ and M. A. Lifshits, *Rate of convergence in the functional law of the iterated logarithm for nonstandard normalizations* 294
M. G. Zavgorodniĭ, *Spectral completeness of the root functions of a boundary value problem on a graph* 298
N. Yu. Kapustin, *On the topological theory of generalized analytic functions* ... 303
I. A. Kuzin, *On block-radial solvability of nonlinear elliptic problems in $\mathbb{R}^N$* ... 309
G. A. Mikhaĭlov and A. V. Voĭtishek, *Convergence of computational models of random fields connected with Palm point flows* 313
O. A. Repin, *A nonlocal boundary value problem for a degenerate hyperbolic equation* 319
V. I. Ryazanov, *On homeomorphisms of Sobolev class and mappings quasiconformal in the mean* 322
G. I. Arkhipov and V. N. Chubarikov, *Three theorems from analysis concerning trigonometric sums* 326
A. V. Borovskikh, K. P. Lazarev, and Yu. V. Pokornyĭ, *On oscillation spectral properties of discontinuous boundary value problems* 328

A. D. Bruno [Bryuno], *First approximations of differential equations* 334
A. O. Vorob′ev and O. Yu. Vorob′ev, *Summation of set-additive functions and the Möbius inversion formula* 340
V. A. Mikhaĭlets, *The one-dimensional Schrödinger operator with point interactions* 345
G. M. Molchan, *Multi-monofractal properties of zeros of Brownian motion* 350
A. S. Podkolzin, *A computer solver of mathematical problems* 355
K. B. Sabitov, *On the Tricomi problem for Chaplygin's equation* 359
M. L. Sodin and P. M. Yuditskiĭ, *Infinite-zone Jacobi matrices with pseudo-extendible Weyl functions and homogeneous spectrum* 364
N. S. Bozhinov, *On the root expansion for a nonlocal integrodifferential Sturm-Liouville operator with integral part of Volterra type* 369
E. A. Volkov, *On solution of the Laplace equation by the block method on polygons under piecewise constant boundary conditions* 375
A. I. Pavlov, *Asymptotics of the number of permutations with number-theoretic restrictions on cycle length* 380
S. A. Sander, *The maximum principle for elliptic problems in the finite element method* 386
A. U. Serikbaev, *On a multidimensional inverse problem for the generalized Weber potential "in the small"* 391
V. P. Tanana and E. V. Tabarintseva, *On a new approach to regularization of ill-posed problems* 394
K. A. Abgaryan, *On synthesis of a control in a multichannel nonstationary automatic control system on the basis of a prescribed set of single-channel subsystems* 398
N. F. Valeev and Ya. T. Sultanaev, *On the asymptotic behavior of solutions of a singular Sturm-Liouville equation* 403
V. P. Glushko and S. A. Tkacheva, *On the heat equation with essentially variable coefficient* 408
V. I. Zubov, *Analytic construction of Lyapunov functions* 414
Yu. F. Korobeĭnik, *On epimorphism of the convolution operator in some spaces of analytic functions* 418
A. P. Makhmudov and M. M. Rasulov, *On perturbation of an isolated eigenvalue of finite multiplicity in a spectral problem for a pair of selfadjoint operators* 423
R. M. Trigub, *Multipliers in the Hardy spaces $H_p(D^m)$, $p \in (0, 1]$, and approximation properties of summation methods for power series* 427
N. A. Shirokov, *Approximation in the sense of Dzyadyk on compact sets with complements of infinite connectivity* 431

Volume 49, Number 3 November 1994

CONTENTS

A. Yu. Vesnin and A. D. Mednykh, *On limit ordinal numbers in the Thurston-Jorgensen theorem on the volumes of three-dimensional hyperbolic manifolds* 435
